

# El Bobo Patiazul

A Virtual Reality Exploration for Spanish Students

Dr. Carmen Campos

Dr. Lori Langer de Ramirez

The Dalton School, NYC

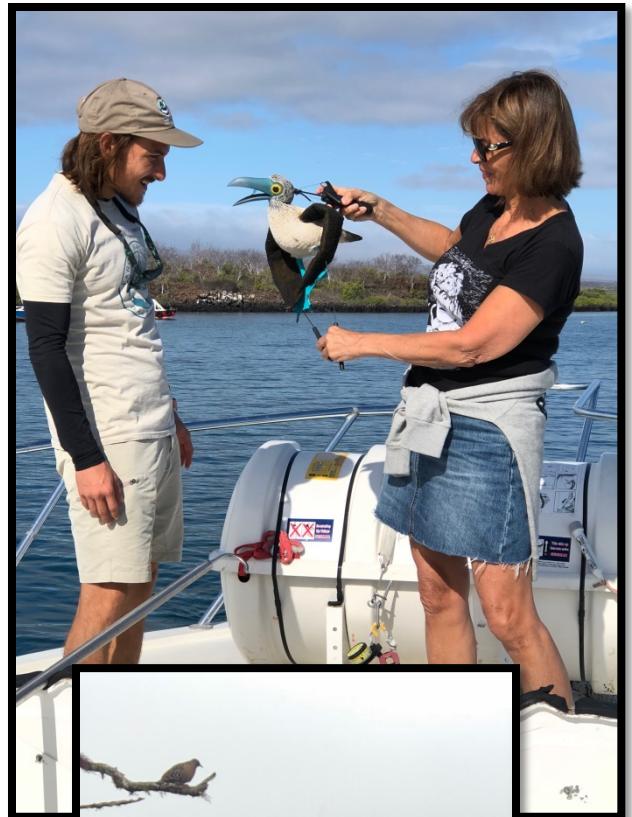

# Our session today:

- Introductions/Overview of trip
- Puppets and Storytelling
- Virtual Reality connections
- Environmental focus and realia
- Sharing resources
- Next steps...
- Questions?

# Our fantasy trip

Vamos a explorar las Islas Galápagos...

¿Qué consecuencias tienen  
los seres humanos  
sobre ese ecosistema?

**Meet Darwin...**

**or is it Darwina?**

...visiting a school...

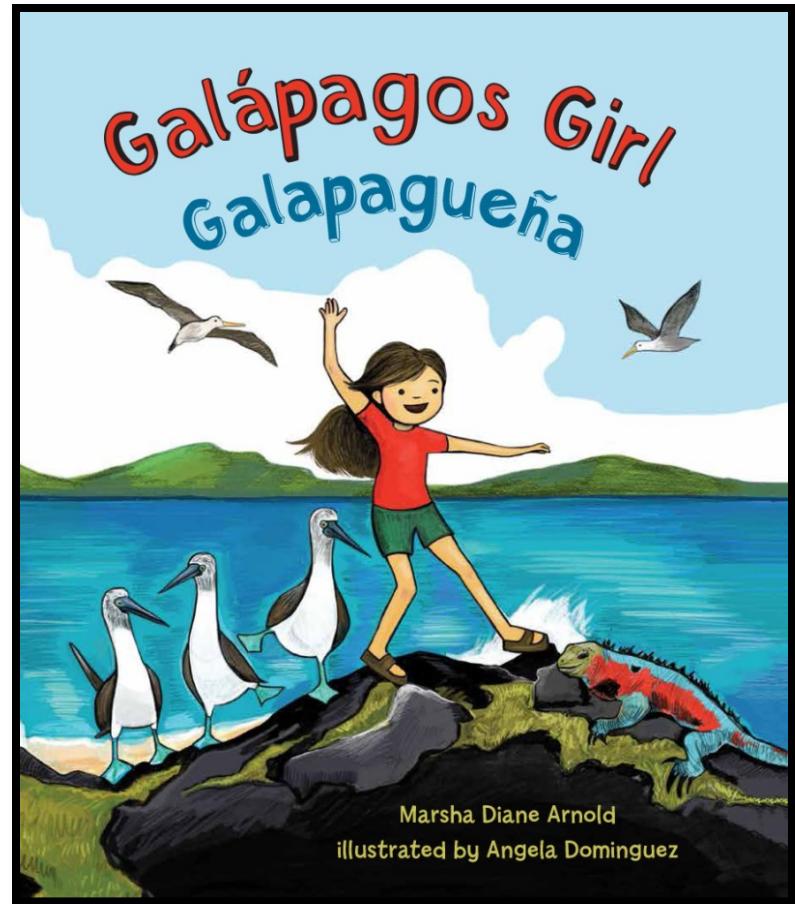

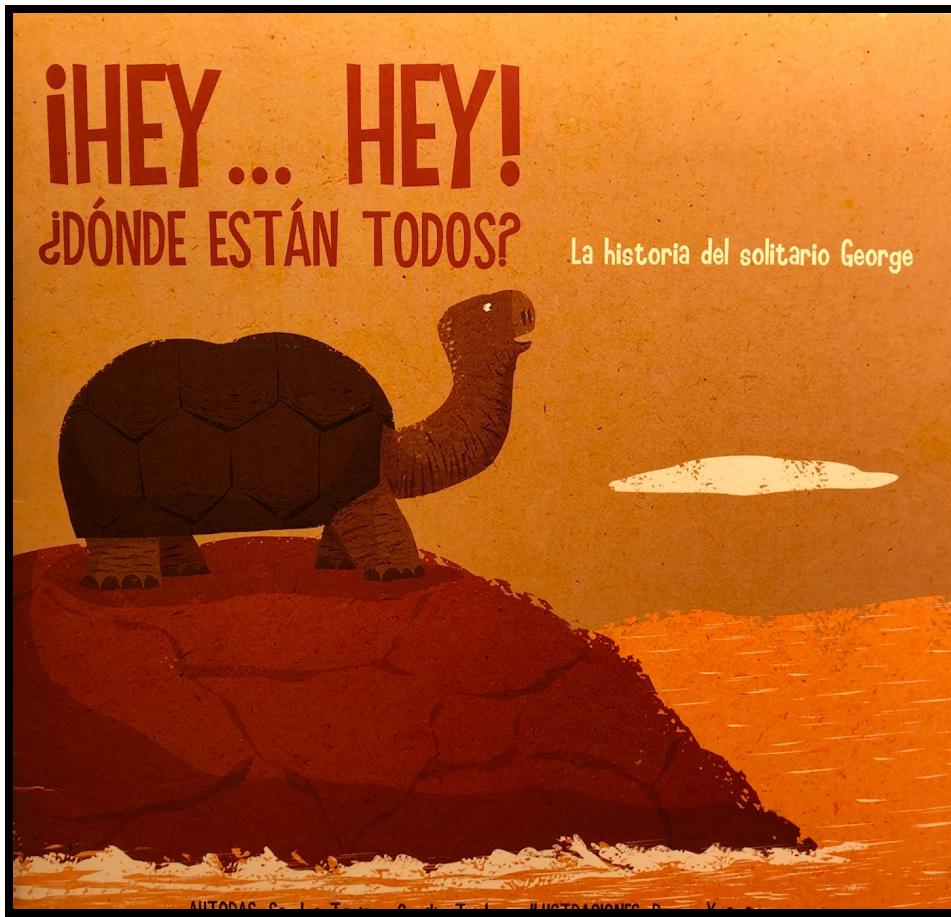

...meeting relatives...

# Reading and Storytelling

# **Un cuento: Un día cualquiera en Punta Pitt**

## Teaching the Galapagos in the Spanish Classroom Resource page

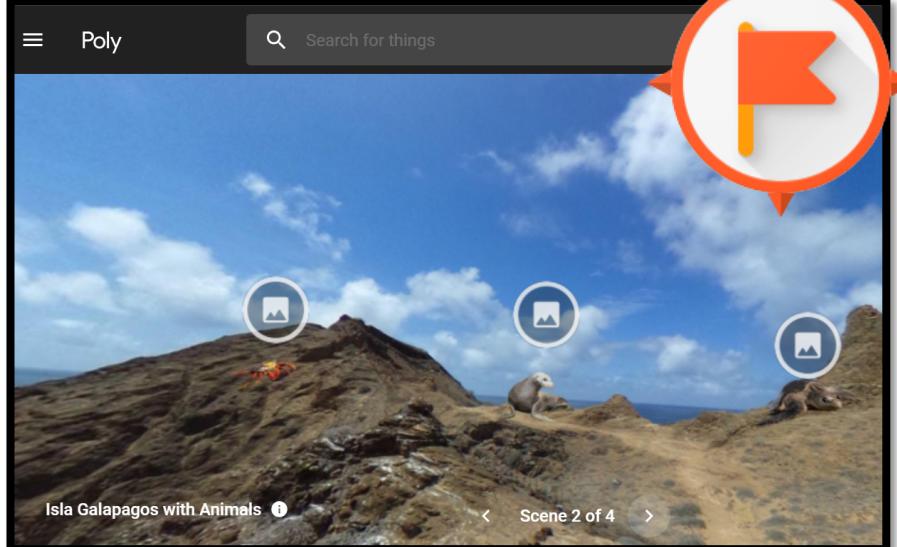

### Background resources (books, photos, information):

- **PowerPoint:** [El Bobo Patiazul - A Virtual Reality Exploration for Spanish Students](#) by Lori Langer de Ramirez and Carmen Campos.
- **Book:** [Atlas de Galápagos, Ecuador - Especies Nativas e Invasores](#). This digital Flipsnack book from the WWF and the [Charles Darwin Foundation](#) contains detailed information in Spanish along with photos and maps to help teach about the endemic and invasive species of the islands.
- **Book:** [Galápagos Big 15](#). This virtual book provides info and photos of the 15 most emblematic animals of the Galápagos Islands. Great maps, photos, and information in Spanish.
- **Book:** [La historia del Solitario George](#). From the Galapagos Conservancy, this tells the story of Lonesome George, including his life, death, and conservation efforts (in Spanish).
- **Blog:** [Descubriendo Galápagos](#). This blog from the [Galapagos Conservation Trust](#) and the [Royal Geographical Society](#) contains lots of information about the geography (both human and natural) of the islands, along with details about conservation efforts.
- **Article:** [¿Cuánto cuesta vivir en las Islas Galápagos?](#) - an interesting article from BBC Mundo with information about the costs of living and socioeconomic issues in the islands.
- **Images:** A [Pinterest board](#) with photos, infographics, illustrations and more visual images of the Galápagos Islands, including the animals, conservation, geography, maps and more.
- **Photos:** A [Flickr Album](#) with tons of photos depicting scenes of Baltra Island, Santa Cruz and San Cristóbal including images animals, and other useful photos for use in teaching (downloadable and free for use in educational settings and projects).
- **Videos:** A [YouTube playlist](#) with videos depicting scenery, children's cartoons, documentaries, home-made movies, and other video resources.

## I AM DR.TOMATO

Hi there, this is Dr. Tomato. I was exported from the Galápagos Islands, which inspired Charles Darwin's *Theory of Evolution* and is considered the rearmost pure land on earth, to Manhattan. I have been enjoying my life here in New York. However, during these years, I realized that the city has serious environmental problems, such as plastic and over-packaging issues, which contrast sharply with its No.1 social and economic status. Therefore, I created this dream place - Tomatoland, as an epitome of Manhattan, to remind people of the significance of protecting the city's environment.

Hope you guys enjoy your journey!

<https://www.thetomatoland.com/about-me>

### CON TODOS USTEDES, EL DR. TOMATO

El protagonista de Tomatoland es **el Dr. Tomato**, un simpático personaje que nos presenta la ciudad desde su punto de vista e **intenta concienciar a los neoyorquinos sobre el consumo excesivo y les anima a que protejan el medio ambiente**.

El Dr. Tomato fue **exportado desde las Islas Galápagos** –las cuales inspiraron la Teoría de la Evolución de Charles Darwin y son consideradas la tierra más pura y remota del planeta– **a Manhattan** y desde entonces vive y disfruta de la Gran Manzana como un auténtico neoyorquino.

Sin embargo, durante estos años, se ha ido percatando de algo: **"me di cuenta de que la ciudad tiene serios problemas ambientales, como los plásticos y el uso excesivo de envases"**.

Por eso, se le ocurrió crear Tomatoland como epítome de Manhattan, **"para recordar a la gente la importancia de proteger el medio ambiente de la ciudad"**, cuenta el Dr. Tomato.
